2. \* 3/8" Check Valves are supplied as complete assemblies.
3. <sup>⊕</sup> Model specific parts, only included if required.
4. <sup>∇</sup> Quantity varies by Model.

NIKKISO Hydroflo® metering pumps have been carefully designed to provide long-term, trouble-free performance in the most demanding chemical feed applications. However, no pump can be designed entirely maintenance-free. NIKKISO solves this challenge by offering Spare Parts Paks which include all necessary parts to perform routine preventative maintenance.

The Spare Parts Paks are factory prepared in vacuum sealed, shrink wrap packages to provide consolidated protection of multiple parts. Benefits include extended parts shelf life, reduced pump downtime, reduced part cost and a single consolidated inventory item.

Spare Parts Paks are readily available for all NIKKISO Hydroflo® pump configurations.
